We heal Water

PURIFICADORES DE AGUA

Why we do what we do.

We created PURA because we are third-generation water treatment experts, offering comprehensive solutions for every need:
From microbrewers in a garage to advanced laboratories. From modern homes to communities without access to safe drinking water.
With 11 proprietary and patented technologies, we deliver systems that solve specific problems while promoting a circular economy.
At PURA, people and the planet are our top priority.

11 proprietary patented technologies + 5 more in progress

Our approach: Water with all the good in it.

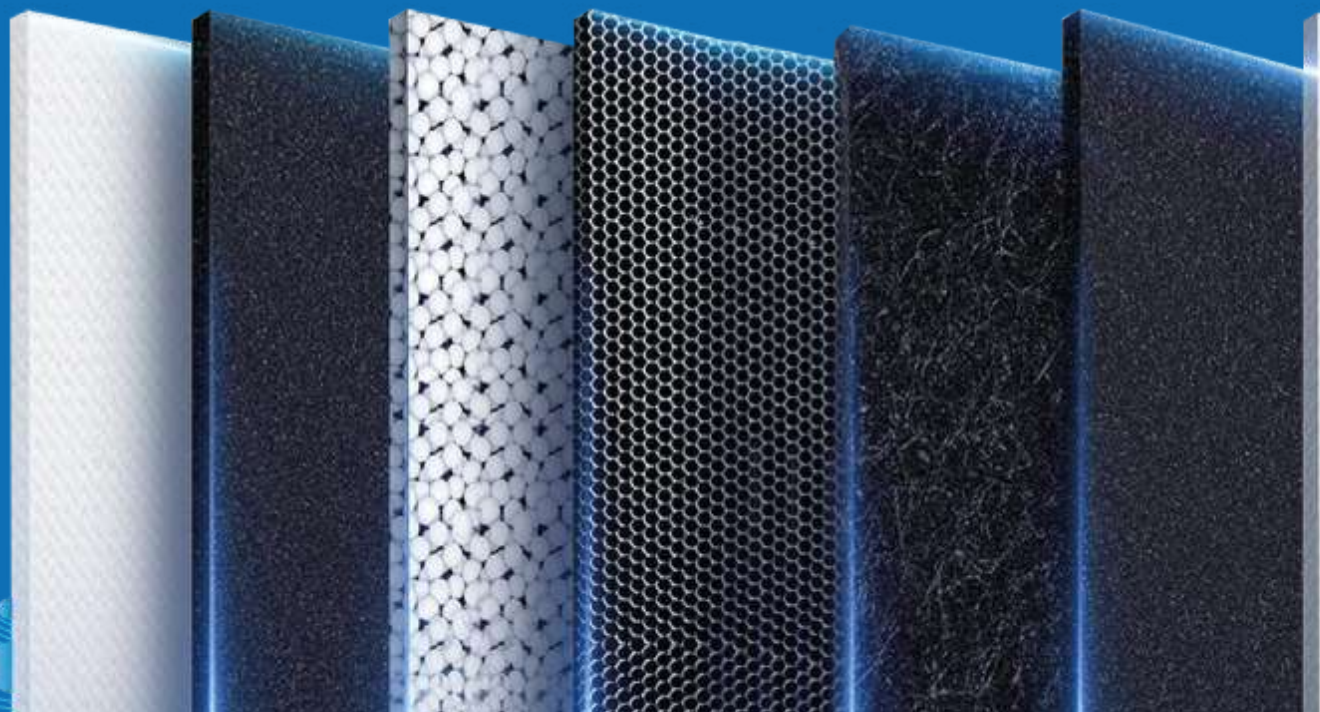
Triple-gradient Microfiltration

Ultrafiltration Adsorption

Selective Adsorption Nanotechnology

Ionizer Remineralizer Alkalinizer

Removes Arsenic



PATENTED TECHNOLOGIES

★★★★★

PURA

What makes us different?

Why PURA?

We carry water treatment in our blood. As third-generation Water Treatment Specialists, we master technology, research, development, and integration into unique solutions.

We're surfers at heart, passionate about what we do and even more about how we do it.

We operate with a Triple Impact business model.

Over 50 years of experience creating solutions

Present in both industries and homes from high-flow systems to personal and family use

International presence across multiple countries

Deep community engagement

Certified B Corporation

Certified Manufacturer by the U.S. Environmental Protection Agency (EPA)

Three generations dedicated exclusively to **water treatment.**

Lucas Barrionuevo
Co-Founder and Director.

Water Regeneration Specialist, Researcher in Sustainable Water Solutions.

Leandro Barrionuevo
Co-Founder and Director.

Specialist in Triple Impact Business Model Development, Sustainability Educator.

Three generations dedicated exclusively to **water treatment.**

We are a B Corporation with Purpose and Triple Impact.

We are part of a global movement driving a cultural shift redefining business success and building a more inclusive and sustainable economy that creates positive change for people and our Planet.

TRIPLE IMPACT

What we do.

At PURA, we are committed to offering you the best possible solution through the combination of cutting-edge purification technologies.
We understand that every water source and every problem is unique, which is why we use a wide range of technologies including microfiltration, ultrafiltration, selective adsorption nanotechnology, and reverse osmosis.
This versatility allows us to adapt to your specific needs and ensure that you always receive the best available technology to obtain the purest and safest water.
Our mission is to deliver the most effective and reliable solution for your water powered by constant innovation and a deep commitment to excellence.

Track your impact, sip by sip.

SOMOS PURA
We heal Water

Offset the pollution of more than 1,000 vehicles per year.

Plant 4 trees per year.

We reduce over 1,500 plastic bottles per year.

Sustainable Hydration

A water jug costs at least 25 times more!
That means with PURA, you save 96% with every sip, protecting both your wallet and the planet at the same time.

Purified Water Irrigation System

Fast Installation. Easy Operation. Low Cost

Impact on Agriculture:

- **Boosted Productivity:** Higher crop yields driven by superior water quality.
- **Reduced Chemical Use:** Less need for fertilizers and pesticides, promoting healthier crops.
- **Driving Sustainability:** Responsible and efficient water use in line with modern, eco-friendly farming practices.

Industrial Water Regeneration:

Installation of a Water Regeneration System in an Industrial Plant.

Results:

Reduced Freshwater Consumption: Treated water is reused within the process.

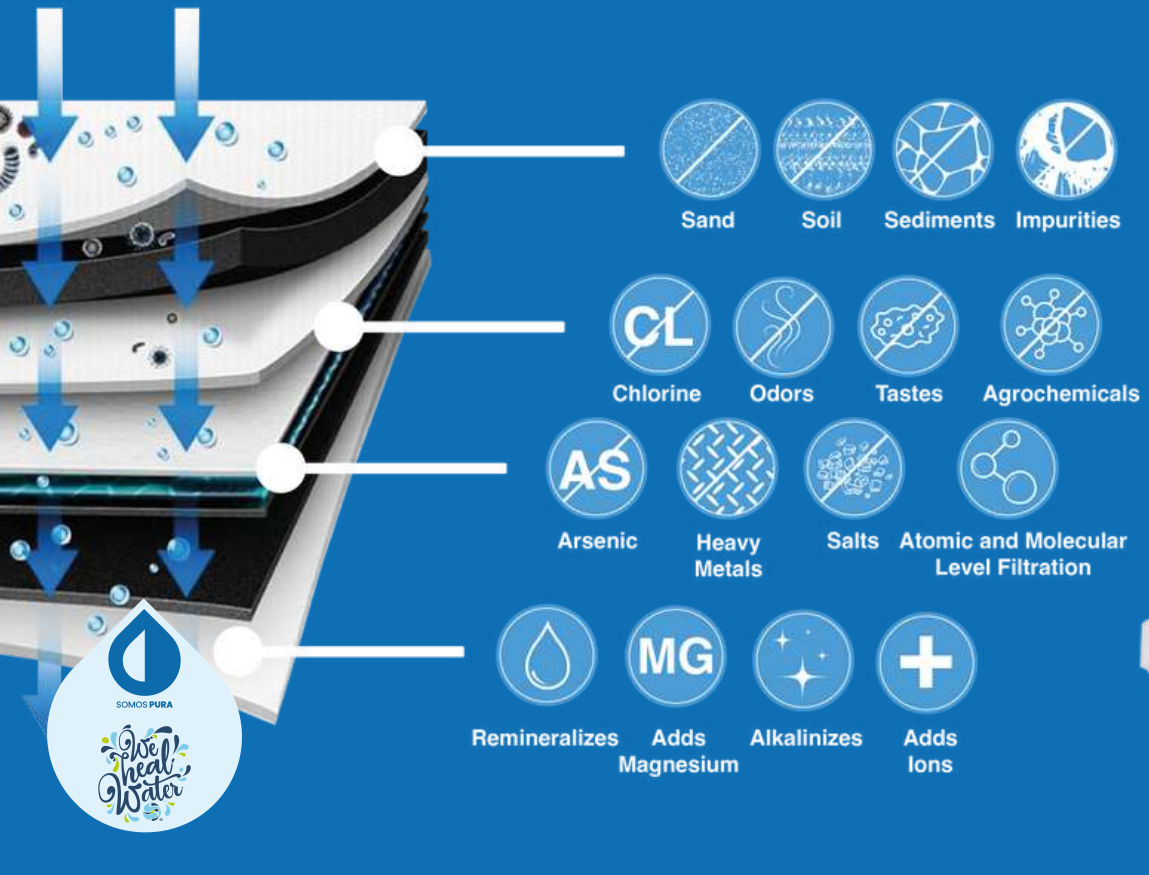
Operational Cost Savings: Lower expenses related to water purchase and treatment.

Compliance with Environmental Regulations: Decreased ecological impact.

- **How do you use water in your business?**
- **Current and desired raw water quality**
- **How much water do you need to treat per day, per week, per month?**

WASH Solutions for Communities and Foundations:

In many regions, conventional filtration is **not enough to remove critical contaminants** such as arsenic, nitrates, fluoride, and other emerging pollutants.
Our PURA INDICO and PURA ANTÁRTICO systems are designed to deliver comprehensive solutions essential in areas with compromised water sources.
Let's bring safe water to more communities together!
We invite foundations and organizations to join us in expanding access points for clean water.



Have FREE WATER and never run out of it.

You'll never run out of water with PURA — we offer unlimited water, 24/7.
Our vision is rooted in the circular economy, where water is continuously purified and reused, eliminating the need for single-use bottles and minimizing waste.
Here's a surprising fact: most of the water wasted in the bottled water industry is used for washing the large plastic jugs before they're refilled.
Every time you choose bottled water, you're unknowingly supporting massive water consumption in a process that is completely unnecessary.
With PURA, our direct and efficient purification approach eliminates the need for jugs entirely — and with it, the water waste they generate.

PURA is the conscious choice for those seeking a more sustainable and responsible approach to hydration.

Driving the democratization of water access forward.

Regenerating and protecting marine ecosystems from plastic pollution.

Fostering and promoting effective partnerships across all sectors to make it possible.

PURA Carbon Footprint

We measure our carbon footprint and actively offset it, with the goal of becoming carbon positive across all our operations.

We Are Zero Waste

We designed and implemented our first Recyclable Waste Management Program.

We Operate with Renewable Energy

We've initiated a cycle of purchasing green bonds through CarbonNeutral+ to operate with 100% certified renewable energy.

With PURA, **save money and protect the planet** by avoiding plastic consumption.

SOMOS PURA
We heal Water

The **"Responsible Companies 2024"** recognition by Grupo Expansión highlights us as a Leading Company in sustainability, social impact, and responsible practices in Mexico.
This recognition validates our commitment to democratizing access to quality water and regenerating the environment, in alignment with the Sustainable Development Goals (SDGs).

We are an **EPA-approved Establishment** (U.S. Environmental Protection Agency) with Establishment Number: 103272-MX-1.

Having the **"1000 Efficient Solutions"** label from a Switzerland-based organization like **Solar Impulse** is, for us, a recognition that clean and profitable technologies are ideal for solving environmental and social challenges.
This label validates the path that connects technology, positive impact, and feasibility of implementation.

We are signatories of the United Nations Global Compact.

The world's largest corporate sustainability initiative.
We publicly commit to upholding the 10 Principles and core values of the United Nations, and to sharing this information with our stakeholders through our main communication channels.

PURA PRODUCTS
WITH CONNECTION

PACIFICO COUNTERTOP

Compatible with all faucets.
Includes a complete, easy to install kit.
Core replacement every 36 months.
Made with stainless steel materials.

Removes 99% of contaminants, including:

PURA MINI

3 Modes of Use:
Rain, Normal and Purified

Direct faucet connection.
Compatible with all faucets.
Includes a complete kit with faucet adapters.
Core replacement every 12 months.
Ultra-compact model.

Removes 99% of contaminants, including:

IGUAZU SHOWER

Easy installation.
Compatible with all showers.
Core replacement every 12 months.
Protects the showerhead from limescale buildup.
Ionized water, pH-balanced, and free of impurities.

PURE STEAM

CARES FOR YOUR HAIR

LONGER-LASTING HAIR COLOR

FOR SENSITIVE SKIN

Pure technology that integrates:

- Triple-gradient Microfiltration
- Ultrafiltration Adsorption
- Selective Adsorption Nanotechnology
- Ionizer Remineralizer Alkalinizer

PURA INDICO

5-Stage Super Purifier.
Includes stainless steel faucet.
Comes with a complete installation kit.
No electricity required.

Removes 99% of contaminants, including:

- AS — Arsenic
- Heavy Metals
- CL — Chlorine

SOMOS PURA

We heal Water

REVERSE OSMOSIS SYSTEM

REVERSE OSMOSIS OIBASE

7-Stage Reverse Osmosis System.
Includes stainless steel faucet.
Comes with a complete installation kit.
The solution for hard and salty water.
Perfect for your home and your business!

Removes 99% of contaminants, including:

Heavy Metals | Sediments | Salts

WHOLE HOUSE
PURA SOLUTIONS

WATER SOFTENER

PURA CARIBE

Includes installation kit.
Fully automatic operation.
Monthly addition of regenerating salt.
Solution for limescale and hard water!

PITCHER BELLS

3-liter capacity.
Core replacement every 6 months.
Food-grade materials.
High-quality purified water!

Compact design to fit in the refrigerator.

DISPENSER FREE

10-liter capacity.
Core replacement every 6 months.
Food-grade materials.
Easy-pour faucet.
High-quality purified water!

Compact design to fit in the refrigerator.

PURIFIER ACTIVE

Ultrafiltration / Block activated carbon.
Flow rate: 300 mL per minute.
Lifespan: 4,000 liters.
Fits any type of bottle.
Food-grade materials.
Provides safe water in the most challenging environments.

Safe to drink from:

River, stream, pond, lake, snowmelt, and freshwater sources.

THERMOS CUP

2 IN 1 Portable Purifying Thermos.
1.2 liter capacity.
Triple layer stainless steel.
Insulated leak proof seal.
Food grade materials.
Includes PURA ACTIVE purifier!

Keeps your drinks cold for 24 hours and hot for 12 hours.

THERMOS SPORT

2 IN 1 Portable Purifying Thermos.
1.2 liter capacity.
Triple layer stainless steel.
Insulated leak proof seal.
Food grade materials.
Includes PURA ACTIVE purifier!

Keeps your drinks cold for 24 hours and hot for 12 hours.

ALWAYS AVAILABLE

Importance of Pretreatment:

Removing contaminants and suspended solids from the water before the main treatment processes.

- **Hyperfiltration:** Retains large particles and sediments.
- **Microfiltration:** Removes smaller particles and certain microorganisms.
- **Activated Carbon:** Adsorbs organic compounds, chlorine, and other chemical contaminants.
- **Water Softening:** Reduces water hardness by removing calcium and magnesium.
- **Disinfection:** Uses chlorine or ultraviolet light to eliminate bacteria and viruses.
